EDUCATION

Academlo

Foundations in HTML, CSS & JAVASCRIPT

Graduated in November 2022

Academlo

Front-End Development with React

Graduated in January 2023

Universidad Nacional de Asunción, Facultad de Arquitectura, Diseño y Arte

Architecture

2017 - Present

MAIN PROJECTS

E-COMMERCE

December 2022 – January 2023

An e-commerce platform is a digital tool that allows businesses seeking to digitally transform themselves to create a virtual store to offer their products and services online.

- Design and development of shopping cart that allows the preview of the items to be purchased, detailing the quantity, type, price and final amount.
- The backend was implemented con JavaScript and the Frontend with HTML5 and CSS;
- The application was tested and approved by Academlo's mentors.

WEATHER APP

November- December 2022

An application that allows you to know the behavior of the weather based on the geographical position in real time.

- The use of an API that collects weather data from multiple weather transmission services worldwide and from more than 40 thousand weather stations was implemented.

POKEDEX

Noviembre- Diciembre de 2022

In this project I have created a Pokedex consuming the PokeApi to obtain the database of more than 1000 pokemon.

- LPokedex has a paging system and for each page will bring a certain amount of pokemon, I have implemented the use of a global status to add a functionality where the user can select their favorite pokemon, it also has a reactive filtering system where you can search for the pokemon that matches the keyword of the search.

USER LIST - INTERFACE

November- December 2022

An application where users can be managed through a CRUD.

- A component called "UsersList" is created where you will list all users, showing their name, surname, email and date of birth. Additionally, you will place two buttons, one to delete, which will execute a "delete" in the API to delete the selected user. And one to edit, which will put all the information of the selected user in "UsersForm".

LOCATIONS RICK AND MORTY

November- December 2022

A site where the user can see information about the locations of the universe of "Rick and Morty" .

- Implemented the use of an API to get the information of a location with a random id.

QUOTE BOX

November- December 2022

The component must display a random appointment at the time of loading the application.

WORK EXPERIENCE

Enterprise

Fernando de la Mora, Central, Paraguay

GV Architecture.

October 2020 – August 2022.

- Resolution of Architectural Projects of exterior and interior; on a small and large scale.
